# Brazil

- 🍅 Production 2020 - 1.4 mm Ton
- 🍅 Surface 2020: 14.505 > 100% irrigation central Pivot
- 🍅 Yield/Ha : 98 Mt.
- 🍅 Farmers : 125-150 (136 to 115 has/farm)
- 🍅 Raw material Brix aprox 4,5 – 4,7
- 🍅 Production for internal market Quality standards.

- **Brazilian Market = after the advent of the corona virus, there was an increase in the consumption of tomato pulp in 2020, thus reducing the remaining stocks from two past harvests;**
- **Good productivity in 2020 (average 98 ton / ha);**
- **Imported chopped tomato extract, whole peeled and high quality standard;**
